Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:
- ☐ the entire international application,
 - ☒ claims Nos. 15 (as to industrial applicability only)
because:
 - ☒ the said international application, or the said claims Nos. 15 relate to the following subject matter which does not require an international preliminary examination (specify):
see separate sheet
 - ☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):
 - ☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.
 - ☐ no international search report has been established for the said claims Nos.
 - ☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:
 - the written form ☐ has not been furnished
 - ☐ does not comply with the standard
 - the computer readable form ☐ has not been furnished
 - ☐ does not comply with the standard
 - ☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-*bis* of the Administrative Instructions.
 - ☐ See separate sheet for further details

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claim 15 relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of this claim (Article 34(4)(a)(I) PCT).

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: WO 02/102793 A (WARNER-LAMBERT COMPANY) 27 December 2002 (2002-12-27)

Novelty (Article 33(2) PCT)

None of the available prior art documents discloses quinazolidinedione derivatives substituted in position 7 by a (poly)cyclic amine residue attached through its ring-nitrogen, said cyclic amine residue being itself substituted by a β -amino-nitrile rest: the subject-matter of claims 1-15 is therefore novel.

Inventive step (Article 33(3) PCT)

D1, which is considered to represent the closest prior art, describes quinazolidinedione derivatives useful as antibacterial agents, see claims.

In the light of the teachings of D1 the problem underlying the present application can be

seen in the provision of further antibacterial agents.

To solve this problem, the present application proposes to substitute the (poly)cyclic amino residue of the compounds disclosed in D1 by a β -amino-nitrile containing substituent.

As such a substituent is not suggested in the available prior art and is moreover not considered as an obvious alternative for the substituent disclosed in D1, the subject-matter of claims 1-15 is considered to involve an inventive step.

Industrial applicability (Article 33(4) PCT)

The compounds and formulation of claims 1-14 can be used in the pharmaceutical industry.

For the assessment of the present claim 15 on the question whether it is industrially applicable, no unified criteria exist in the PCT Contracting States.
